Quotes of the HON'BLE PRIME MINISTER for

- ▶ We are transforming governance, making it more transparent, accountable, accessible and participative. We are using technology to impart scale and speed to development.
- ▶ Our demographic dividend is our strength. The youth have what it takes to engage with the latest technology and master it.
- ▶ When you think of the exponential speed and scale of expansion of social media or a service, you have to believe that it is equally possible to rapidly transform the lives of those who have long stood on the margins of hope.

**We are the
world's
fastest
growing
major
economy**

NARENDRA MODI
Hon'ble Prime Minister of India

- We have launched an aggressive expansion of the National Optical Fibre Network that will take broadband to our 600,000 villages. We will connect all schools and colleges with broadband. Building I-ways are as important as highways.
- There was a time when urbanisation was considered as a problem but I think urbanisation must be considered as an opportunity. Soon cities would emerge, not on the basis of water bodies or highways, but on the basis of optical fibre network.
- Our cities are the driving force of our economy. We are making the city a hub of a vibrant economy. Our efforts should be to keep our cities clean as well as healthy.
- Most of the cities in our country are traditional cities and have developed in a traditional way. In this era of modernization, the antiquity of these cities is equally important. We can learn a lot from every street, stone, moment and history of our ancient cities. We can learn how to advance our local art skills and products and make them the hallmark of the city!
- India is celebrating the Amrit Mahotsav of Independence. There should be public participation in the development of the city and we should give emphasis on it.
- 'Brand India' is being built out of 5-Ts - talent, tradition, tourism, trade and technology.
- India has: Taste for technology. Trust in risk takers. Temperament for reform.
- Many tech innovations are among the biggest transformations of our era. Technology has emerged as a force multiplier in battling poverty. Digital solutions can show the way to solve global challenges like climate change. Our emphasis on making digital technology more inclusive is bringing a meaningful change in the lives of the poor. India's tech related efforts have also helped millions of Indians, particularly during the pandemic.
- From long lines to online... the last few years have witnessed effective usage of technology to boost 'Ease of Living.'
- Technology means greater transparency.

In India, technology is a force of equality and empowerment

Technology means enhanced 'Ease of Living.' The numerous strides in technology in the last few years are powering India's growth.

- India has shown how to democratise technology. India has also shown how to give tech a human touch. In India, technology is a force of equality and empowerment.
- Technology brings transformation. Some of you may have heard that India is the world's number 1 in real-time digital payments.
- In India, technology is not an agent of exclusion. It is an agent of inclusion.
- We see urbanisation as an opportunity and we are committed to making our cities world class urban spaces that further 'Ease of Living.'
- Urbanisation is on the rise and we in India are fully prepared to ensure our cities have top quality infrastructure. Increase in the number of cities with metro connectivity over the last few years has been tremendous.
- India is on the move. Our economy is on the move. We are the world's fastest growing major economy. Our cities and towns are on the move. We are building 100 smart cities. Our infrastructure is on the move. We are speedily building roads, airports, rail lines & ports.
- Today, while India is building 100 smart cities across the country, it is also ensuring rapid progress in over 100 aspirational districts. Today, while India has become a net exporter of electricity, it has also ensured that crores of households get electricity.

My warmest regards to all the participants. This is India's time! As we develop into a developed & prosperous nation; as 140 crore Indians work with the spirit and energy of a new India; an India powered by its women and its youth – full of hope and aspiration for the future; as we adopt future technologies so seamlessly – in governance, in manufacturing, in our day-to-day lives – this is the sunrise sector. All of you will be the participants of this bright & prosperous future..

INDUSTRY Speak

From engaging discussions to impactful networking opportunities, the expo provided a platform for meaningful connections. It was an excellent opportunity to grow personally and professionally & we got the exposure needed to pivot the brand towards success. We are grateful for the chance to connect with everyone here.

JENICE D'SOUZA
Marketing Specialist, Ubiquiti

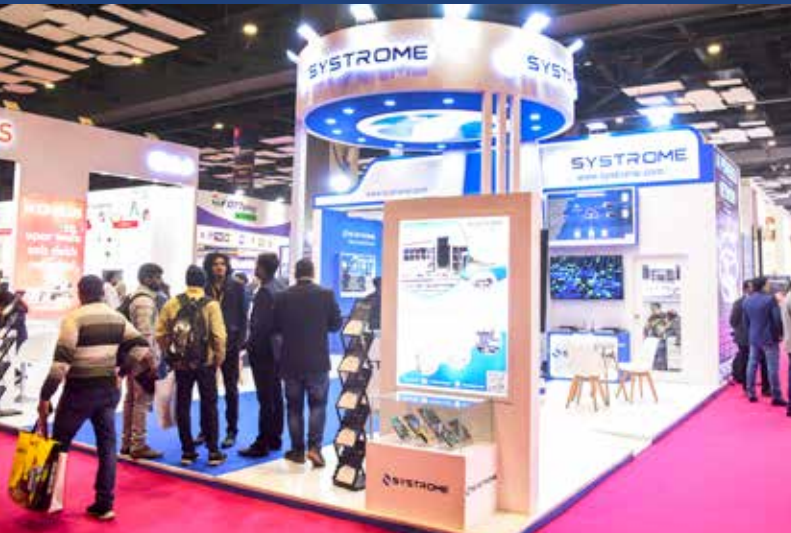

GX Group is proud of its successful participation. It allowed us to showcase our latest advancements in Wi-Fi 6, 5G & next-generation fiber Internet.

SHIVANI PANDEY
Manager-Global Sales, GX Group

Convergence India is an ideal platform to display our innovations and explore other newer technologies.

ANILRAJ THULASIDAS
Director, Systrome Networks

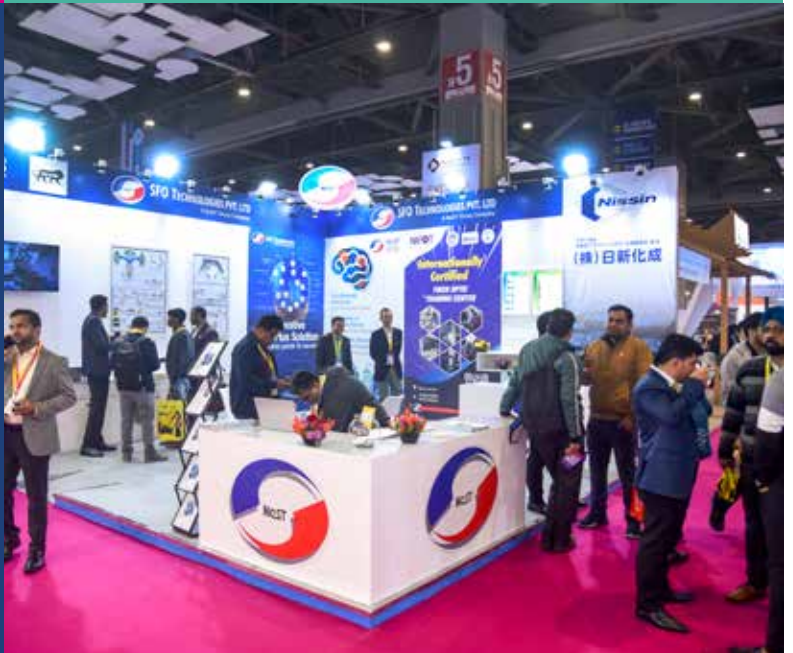

The event served as a dynamic hub for digital tech and innovation, attracting industry players eager to explore the latest advancements in IoT. We engaged in fruitful discussions with partners, exhibitors and other attendees, exchanging ideas and exploring opportunities for collaboration and growth.

MUSTAFA MURAD
COO, Gulfsat

The event provided an excellent opportunity to showcase our innovations and delve into emerging technology. The event exceeded our expectation with remarkable turnout, which generated numerous inquiries.

RAGHUNATH T N
Sr. General Manager, SFO Technologies

A well-organized event that witnessed attendance from key brands, government, & stakeholders from relevant industries. The event had thought provoking discussions and served as a great platform to understand & showcase disruptive technologies. Renowned leaders from the industry touched upon topical issues, which helped attendees know more about the latest technology trends and how fintech's can build sustainable businesses.

AKANKSHA JAIN
Head PR & Corporate Communications, BharatPe

The Convergence India & Mobile India expo is a revolutionary platform for new dealer connections and to expand business networking. We received a lot of enquiries from the targeted visitors, as the footfall was unexpectedly amazing.

ATUL GUPTA
Managing Director, Lapcare

This is our second participation at the expo. The response has been great. We received several smart city representatives and consultants at our booth and got good exposure by visiting other participants as well. Several good leads were generated, and the overall experience was wonderful.

SOURABH SHARMA
Sr. Manager, Astral Limited

We got the chance to connect with the various smart city representatives, with whom we found good traction. They are upgrading our cities in line with the government of India's vision, and the expo has proven itself to be a very good platform for suppliers like us to interact with the Smart City management.

ANSHUL SAXENA
President & CEO, Baxy

“

This is a very good initiative, because it brings different players together – from EVs to app developers to energy technology companies. There were participants who were doing unique work and innovating in favour of Smart Cities and in clean technologies.

VAMSI KRISHNA M
MD & Founder, Kosher Climate

“

The perfect place to connect with learned delegates from different continents. It was impressive & informative!

JASPREET SINGH DHANJAL
CTO, Nelito Systems

“

This is our first time at the expo, and it's been quite an experience! One of the biggest learnings has been the technologies that are being used in Smart City development, many of which we're already implementing.

VAIBHAV MITTAL
VP, Reliance Met City
